ISPA Partnership Programme 2020-2021

Engage with the organisations delivering next generation communication services
WHO IS ISPA

Founded in 1995, the Internet Services Providers’ Association (ISPA) is the voice of the UK internet industry representing over 150 providers of Internet services in the UK.

We lobby Government and engage with our members, through events, meetings and communications to promote our vital sector.

“The internet sector has now become fully mainstream and is one of the biggest drivers of innovation, growth and overall human satisfaction. Internet related issues now top the list of policy challenges facing policymakers in the UK and across the world. ISPA reflect the full spectrum of the UK ISP industry and the contributions that the sector makes to businesses and consumers across the UK.”
